HYBRID

D1X  
WATERPROOF

BLACK SEA

BLACK SEA

The D1X is part of the new generation of amazing and unique Insulated Constant Volume Drysuits, developed and patented a couple of years ago. There is, so far, no followers from competitors to match these unique features. At Waterproof we have always been keen on keeping up with the latest materials and developments and the D1X is the result of this.

The outer fabric of D1X is made of soft, flexible and strong Polytech 500 Tri-Lam fabric. The patented system of D1X includes a detachable, integrated 3D Mesh inner lining – a soft and flexible material with outstanding insulation. The suit is equipped with a metal dryzipper with zipper cover, SI TECH Quick Neck System with Warm Neck, SI TECH QCS Oval Ring System with Warm Cuffs, Silicone seals for neck and wrists, heavy duty expandable pockets and SI TECH valves. The unique Warm Neck and Cuff system is keeping the diver warmer, due to reduced water movement, and also protects the seals.

All parts of the suit concerning mobility have been anatomically designed to enhance the freedom of movement. The suit has DuPont™ Kevlar® fiber reinforced knee pads, a seam-free crotch area reinforced with heavy duty Cordura® and anti-slip seat for grip and abrasion protection – all this to ensure an excellent durable and comfortable drysuit.

# D1X

## PATENTED 3D MESH DRYSUIT CONCEPT

**MATERIAL** - Strong Polytech 500 Tri-lam fabric and front in Nylotech, our newly developed Tri-Lam material, soft, flexible and stronger than ever. The patented system with the integrated 3D Mesh inner lining 50D is soft and flexible with outstanding insulation. The inner lining is detachable for washing.

**WARM NECK** - The unique Warm Neck solution from Waterproof keeps you warmer due to reduced water movement around the neck. Equipped with drain valves and Velcro tabs.

**WARM CUFF** - The arms are equipped with detachable Warm Cuffs that minimize heat loss at the wrists and protect the seals.

**KNEE PADS** - Military Graded DuPont™ Kevlar® fiber reinforced knee pads.

**REINFORCEMENT** - Crotch area is reinforced with heavy duty Cordura®.

**CHILL GUARD** - Keeps your body heat in and your undergarments out of the zipper for trouble-free operation.

**SEAM-FREE CROTCH** - The crotch is made in one piece, no seams. This to ensure an excellent durable and comfortable suit.

**SI TECH VALVES** - Swivelling inlet valve and an adjustable automatic outlet valve. Provided by SI TECH.

**MOLDED VELCRO TABS** - TPE tab with moulded Velcro hooks, for adjusting the Warm Neck and Warm Cuffs, sticks only to the assigned Velcro part.

**PLASTIC-FREE PACKAGING** - 100% plastic-free packaging in accordance with our vision of no more plastic in the oceans.

**INCLUDED** - Dry bag, hood, inflation hose, adjustable integrated suspenders, spare silicone set, Neck Tite Tool, zip lubricant and user manual.

Men: XS, S, M, ML, L, XL, XXL, 3XL\*, M/+, L/+, S/t, M/t, ML/t, L/t, XL/t, XXL/t, 3XL/t+\*

Ladies: XS, S, M, ML, L, XL, M/+, L/+, ML/t

\*Please note! 3XL and 3XL/t have larger wrist rings. These rings do not fit the Ultima DGS system but fit the Quick Glove system from SI TECH.

D1X Hybrid Men: Art. No. 672-1

D1X Hybrid Ladies: Art. No. 672-2

### 3D-MESH INNER LINING

The mesh lining does not compress, maintaining a constant insulating distance between you and the cold water.

### POCKETS

Heavy duty expandable zippered Power Pockets allow you to easily choose between huge capacity or slim profile pockets. Equipped with a lid grip, stainless AISI 316 D-ring and double cord loops.

### ZIPPER COVER

Velcro closing cover provides protection of your dry zipper.

### ANATOMICAL FIT

All critical parts concerning mobility, like torso, pre-bent arms and legs have been anatomically designed to enhance the freedom of movement.

### BOOTS

Anatomical DuPont™ Kevlar® reinforced boots. Angled for the best mix of durability and performance, manufactured in a new hard-core tested rubber formula. Kevlar® reinforced front. Moulded fin strap anchor.

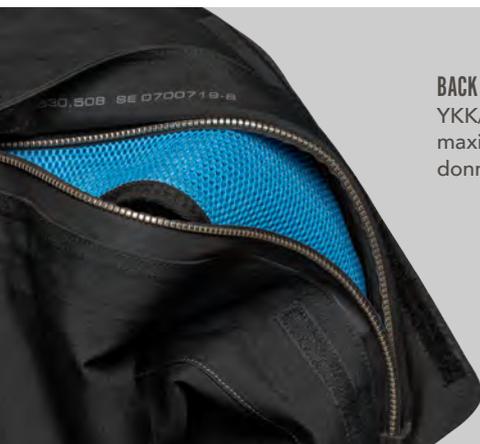

### SI-TECH QCS OVAL RING SYSTEM

The wrists are equipped with QCS ring system with comfortable Waterproof Silicone Wrist Seals. Easy to change. Latex seals are compatible. Optimised for the use of the ULTIMA dry glove system.

### ANTI-SLIP

Anti-slip treatment seat provides a non-slip grip and abrasion protection.

### BACK ZIP

YKK/BDM metal dryzipper, maximal extended for easy donning and doffing.

### SI TECH QUICK NECK

The neck is equipped with SI TECH Quick Neck System and comes with Waterproof Silicone Neck Seal. Extremely comfortable and easy to change. Latex and neoprene seals are also compatible.

# D7X

NYLOTECH

D7X Nylotech is a drysuit made of a new Tri-lam material, developed to be softer and yet more resistant to abrasion. A drysuit for the demanding diver. Development in material and enhanced polymer science has made it possible for us to make the perfect Tri-Lam drysuit.

A reshaped and slimmer fit with adjustable telescopic torso provides a less bulky drysuit. The suit is sewed with single stitch and soft rubber taped seams, which makes the suit really flexible and comfortable. A new, longer and curved front-zipper, placed higher up on the shoulder enhances upper body movement as well as providing effortless donning and doffing. The metal dryzipper is protected by an outer coil zipper with fabric backing, ensuring the functionality of the drysuit and safety of the diver. Improved boots utilising a newly researched and hardcore tested rubber formula.

The suit is equipped with SI TECH Quick Neck System and Warm Neck, SI TECH QCS Oval Ring System with Warm Cuffs, Silicone seals for neck and wrists, heavy duty expandable zippered Power pockets and SI TECH valves. D7X Nylotech is a soft, flexible and durable drysuit – the perfect choice for the advanced diver.

# D7X

## NYLOTECH

**MATERIAL** · Nylotech, our newly developed Tri-Lam material, soft, flexible and stronger than ever. Abrasion tested by the Martindale Method according to SS-EN ISO 12947-2:2017.

**SEAMS** · Single-stitched and singled-taped for improved flexibility.

**ANATOMICAL FIT** · All critical parts concerning mobility, like torso, pre-bent arms and legs have been anatomically designed to enhance the freedom of movement.

**WARM CUFF** · The arms are equipped with detachable Warm Cuffs that minimize heat loss at the wrists and protect the seals.

**REINFORCEMENT** · Crotch area is reinforced with heavy duty Cordura®.

**ANTI-SLIP** · Anti-slip treatment seat provides a non-slip grip and abrasion protection.

**ZIPPER COVER** · Heavy duty cover with outer coil zipper #10, provides maximum protecting of the dry zipper.

**CHILL GUARD** · Keeps your body heat in and your undergarments out of the zipper for trouble-free operation.

**SI TECH VALVES** · Swivelling inlet valve and an adjustable automatic outlet valve. Provided by SI TECH.

**MOLDED VELCRO TABS** · TPE tab with moulded Velcro hooks, for adjusting the Warm Neck and Warm Cuffs, sticks only to the assigned Velcro part.

**PLASTIC-FREE PACKAGING** · 100% plastic-free packaging in accordance with our vision of no more plastic in the oceans.

**INCLUDED** · Dry bag, hood, inflation hose, adjustable integrated suspenders, spare silicone set, Neck Tite Tool, zip lubricant and user manual.

Men: XS, S, M, ML, L, XL, XXL, 3XL\*, M/+, L/+, ML/t, XL/t, 3XL/t+\*

Ladies: XS, S, M, ML, L, XL, M/+, L/+, ML/t

\*Please note! 3XL and 3XL/t have larger wrist rings. These rings do not fit the Ultima DGS system but fit the Quick Glove system from SI TECH.

D7X Nylotech Men: Art. No. 665-1

D7X Nylotech Ladies: Art. No. 665-2

### WARM NECK

The unique Warm Neck solution from Waterproof keeps you warmer due to reduced water movement around the neck. Equipped with drain valves and Velcro tabs.

### FRONT ZIP

Long and curved YKK/BDM metal dryzipper, placed higher up on the shoulder to enhance upper body movement as well as providing effortless donning and doffing to boost the overall diving experience.

### SEAM-FREE CROTCH

The crotch is made in one piece, no seams. This to ensure an excellent durable and comfortable suit.

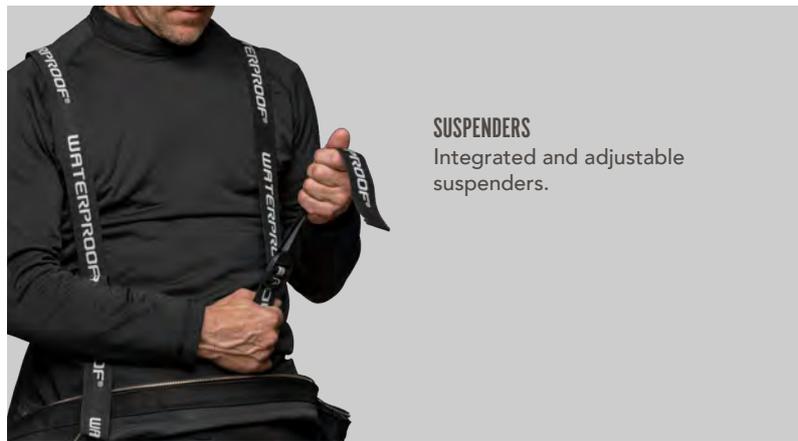

### BOOTS

Anatomical DuPont™ Kevlar® reinforced boots. Angled for the best mix of durability and performance, manufactured in a new hard-core tested rubber formula. Kevlar® reinforced front. Moulded fin strap anchor.

### SI TECH QCS OVAL RING SYSTEM

The wrists are equipped with QCS ring system with comfortable Waterproof Silicone Wrist Seals. Easy to change. Latex seals are compatible. Optimised for the use of the ULTIMA dry glove system.

### SUSPENDERS

Integrated and adjustable suspenders.

### KNEE PADS

Military Graded DuPont™ Kevlar® fiber reinforced knee pads.

### POCKETS

Heavy duty expandable zippered Power Pockets allow you to easily choose between huge capacity or slim profile pockets. Equipped with a lid grip, stainless AISI 316 D-ring and double cord loops.

### TELESCOPIC TORSO

Suspenders and the adjustable torso system enables the diver to fit the suit to their liking.

### SI TECH QUICK NECK

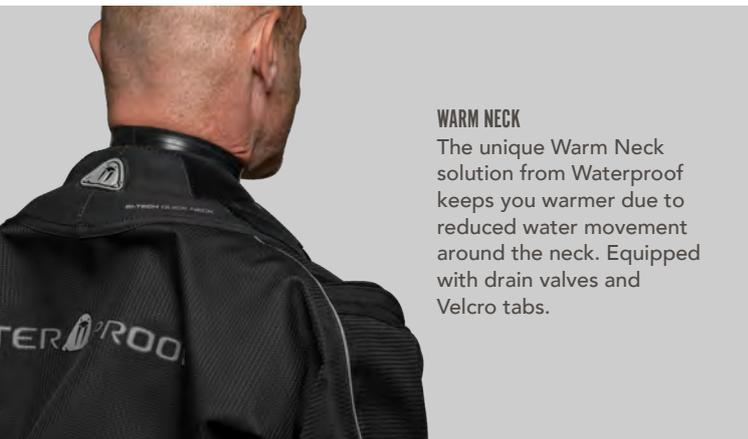

The neck is equipped with SI TECH Quick Neck System and comes with Waterproof Silicone Neck Seal. Extremely comfortable and easy to change. Latex and neoprene seals are also compatible.

# D7X

## CORDURA

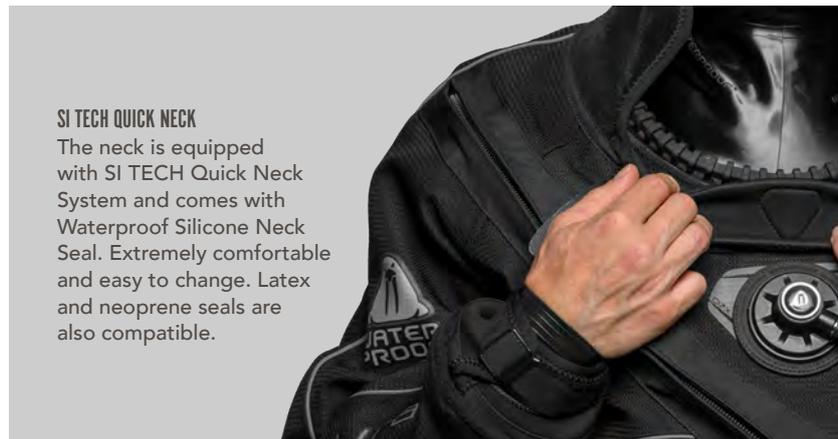

D7X Cordura, our latest Cordura® drysuit on the market, is an excellent choice of drysuit for the advanced diver. Development in material and enhanced polymer science has made it possible for us to make the perfect Tri-Lam Cordura drysuit. The entire outer fabric is made of heavy duty Cordura® fabric, providing exceptional abrasion and tear resistance.

A reshaped and slimmer fit with adjustable telescopic torso provides a less bulky drysuit. The suit is sewed with single stitch and soft rubber taped seams, which makes the suit really flexible and comfortable. A new, longer and curved front-zipper, placed higher up on the shoulder enhances upper body movement as well as providing effortless donning and doffing. The metal dryzipper is protected by an outer coil zipper with fabric backing, ensuring the functionality of the drysuit and safety of the diver. Improved boots utilising a newly researched and hardcore tested rubber formula. The suit is equipped with SI TECH Quick Neck System and Warm Neck, SI TECH QCS Oval Ring System with Warm Cuffs, Silicone seals for neck and wrists, heavy duty expandable zippered Power Pockets and SI TECH valves. D7X Cordura makes diving in challenging environments a more pleasurable and effortless experience.

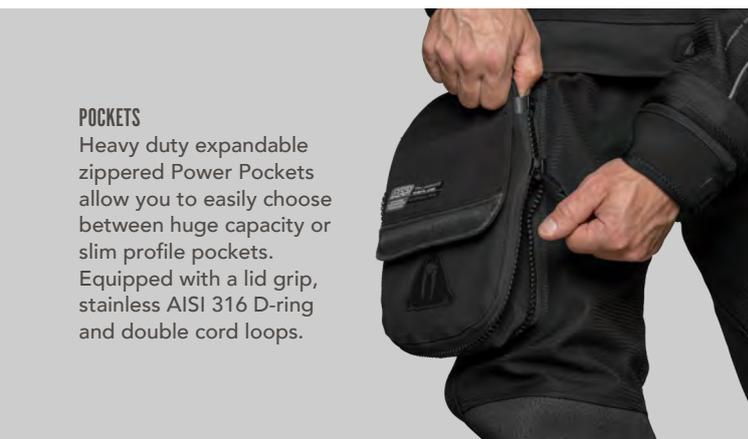

### WARM NECK

The unique Warm Neck solution from Waterproof keeps you warmer due to reduced water movement around the neck. Equipped with drain valves and Velcro tabs.

### SI TECH QUICK NECK

The neck is equipped with SI TECH Quick Neck System and comes with Waterproof Silicone Neck Seal. Extremely comfortable and easy to change. Latex and neoprene seals are also compatible.

### POCKETS

Heavy duty expandable zippered Power Pockets allow you to easily choose between huge capacity or slim profile pockets. Equipped with a lid grip, stainless AISI 316 D-ring and double cord loops.

### BOOTS

Anatomical DuPont™ Kevlar® reinforced boots. Angled for the best mix of durability and performance, manufactured in a new hard-core tested rubber formula. Kevlar® reinforced front. Moulded fin strap anchor.

### SEAM-FREE CROTCH

The crotch is made in one piece, no seams. This to ensure an excellent durable and comfortable suit.

### SI TECH QCS OVAL RING SYSTEM

The wrists are equipped with QCS ring system with comfortable Waterproof Silicone Wrist Seals. Easy to change. Latex seal are compatible. Optimised for the use of the ULTIMA dry glove system.

**MATERIAL** - This Tri-Lam material has an entire outer fabric in Heavy Duty Cordura®, providing exceptional abrasion and tear resistance.

**FRONT-ZIP** - Long and curved YKK/BDM metal dryzipper, placed higher up on the shoulder to enhance upper body movement as well as providing effortless donning and doffing to boost the overall diving experience.

**ANATOMICAL FIT** - All critical parts concerning mobility, like torso, pre-bent arms and legs have been anatomically designed to enhance the freedom of movement.

**WARM CUFF** - The arms are equipped with detachable Warm Cuffs that minimize heat loss at the wrists and protect the seals.

**KNEE PADS** - Military Graded DuPont™ Kevlar® fiber reinforced knee pads.

**REINFORCEMENT** - Crotch area is reinforced with heavy duty Cordura®.

**ANTI-SLIP** - Anti-slip treatment seat provides a non-slip grip and abrasion protection.

**ZIPPER COVER** - Heavy duty cover with outer coil zipper #10, provides maximum protecting of the dry zipper.

**CHILL GUARD** - Keeps your body heat in and your undergarments out of the zipper for trouble-free operation.

**TELESCOPIC TORSO** - Suspenders and the adjustable torso system enables the diver to fit the suit to their liking.

**SI TECH VALVES** - Swivelling inlet valve and an adjustable automatic outlet valve. Provided by SI TECH.

**MOLDED VELCRO TABS** - TPE tab with moulded Velcro hooks, for adjusting the Warm Neck and Warm Cuffs, sticks only to the assigned Velcro part.

**PLASTIC-FREE PACKAGING** - 100% plastic-free packaging in accordance with our vision of no more plastic in the oceans.

**INCLUDED** - Dry bag, hood, inflation hose, adjustable integrated suspenders, spare silicone set, Neck Tite Tool, zip lubricant and user manual.

D7X Cordura Ladies: Art. No. 667-2

# D3

ERGO

WATERPROO

D3 Ergo is a lightweight, soft and durable drysuit – a rare combination. We have developed and tested drysuit material together with our producer since 1983, and this drysuit is made of the best lightweight Tri-Lam fabric they have ever developed. The suit is also sewn with single stitch and soft rubber taped seams, which makes it really flexible and comfortable.

The D3 Ergo is equipped with soft, flexible neoprene boots, SI TECH Quick Neck System and Warm Neck, SI TECH QCS Oval Ring System and Warm Cuffs, Silicone seals for neck and wrists, a plastic dryzipper, light pockets with loops inside and SI TECH valves. The whole suite with valves, boots, seals and suspenders weighs only 4.1 kg (in men's medium). The D3 Ergo originates from our expedition- and military suits, where lightweight, flexibility and movability is essential.

We realized that these characteristics were desired among other divers, so we decided to make a similar suit with strong Tri-Lam fabric. So, if you love movability, flexibility, a snug fit, low weight and durability – this is the suit for you. D3 Ergo is designed for unrestricted movability and control, both above and below the surface. Therefore, it has a slimmer cut around the torso and legs for less drag and unnecessary air movement. The suit has more space around the shoulders to improve the movability in this area. With the placement of the dry zipper and the very soft Tri-Lam fabric, there are literally no restrictions in movement.

# D3

## ERGO

**MATERIAL** - The special formula Tri-Lam fabric is lightweight, soft, and durable – a rare combination. Abrasion tested by the Martindale Method according to SS-EN ISO 12947-2:2017. The suit weighs 4.1kg (Man's medium).

**ANATOMICAL FIT** - All critical parts concerning mobility, like torso, pre-bent arms and legs have been anatomically designed to enhance the freedom of movement.

**SI TECH QUICK NECK** - The neck is equipped with SI TECH Quick Neck System and comes with Waterproof Silicone Neck Seal. Extremely comfortable and easy to change. Latex and neoprene seals are also compatible.

**WARM CUFF** - The arms are equipped with detachable Warm Cuffs that minimize heat loss at the wrists and protect the seals.

**ANTI-SLIP** - Anti-slip treatment seat provides a non-slip grip and abrasion protection.

**SI TECH VALVES** - Swivelling inlet valve and an adjustable automatic outlet valve. Provided by SI TECH.

**MOLDED VELCRO TABS** - TPE tab with moulded Velcro hooks, for adjusting the Warm Cuffs, sticks only to the assigned Velcro part.

**PLASTIC-FREE PACKAGING** - 100% plastic-free packaging in accordance with our vision of no more plastic in the oceans.

**INCLUDED** - Dry bag, inflation hose, adjustable integrated suspenders, spare silicone set, Neck Tite Tool, zip lubricant and user manual.

Men: XS, S, M, ML, L, XL, XXL, 3XL\*

Ladies: XXS, XS, S, M, ML, L, XL

\*Please note! 3XL has larger wrist rings. These rings do not fit the Ultima DGS system but fit the Quick Glove system from SI TECH.

D3 ERGO Men: Art. No. 510-1

D3 ERGO Ladies: Art. No. 510-2

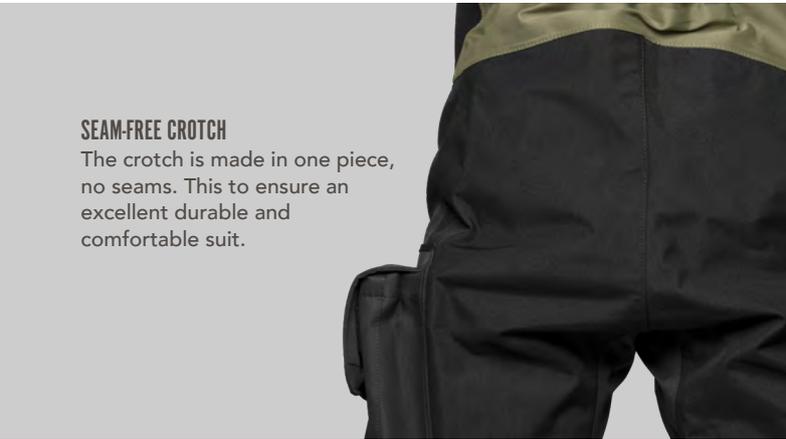

#### WARM NECK

The neck is equipped with super-stretch neoprene collar that minimize heat loss.

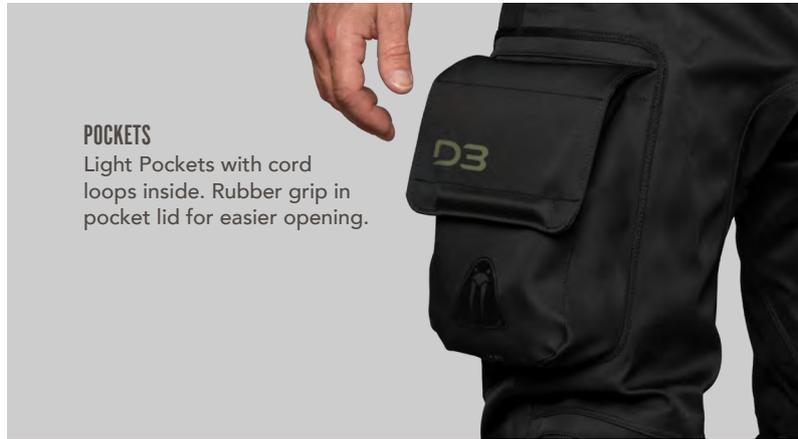

#### BACK-ZIP

Light and flexible YKK AQUASEAL #10 plastic dryzipper. The placement enables you to open and close the zipper by yourself.

#### SEAM-FREE CROTCH

The crotch is made in one piece, no seams. This to ensure an excellent durable and comfortable suit.

#### POCKETS

Light Pockets with cord loops inside. Rubber grip in pocket lid for easier opening.

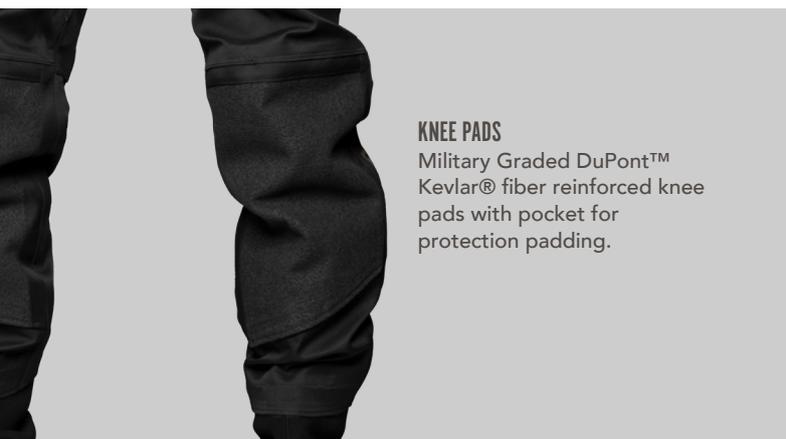

#### SI TECH QCS OVAL RING SYSTEM

The wrists are equipped with QCS ring system with comfortable Waterproof Silicone Wrist Seals. Easy to change. Latex seals are compatible. Optimised for the use of the ULTIMA dry glove system.

#### SUSPENDERS

Integrated and adjustable suspenders.

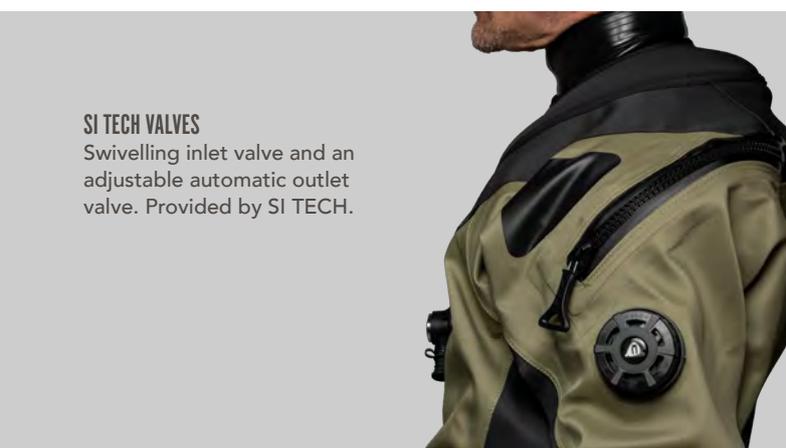

#### KNEE PADS

Military Graded DuPont™ Kevlar® fiber reinforced knee pads with pocket for protection padding.

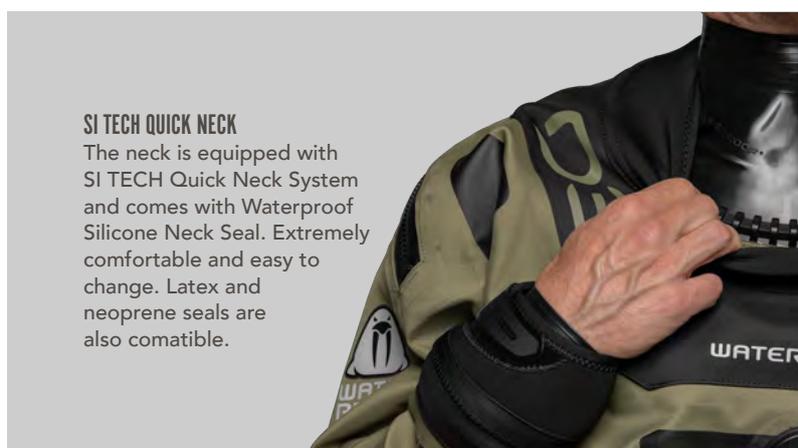

#### BOOTS

Xlite flexboot, soft, light and flexible boot with fin strap ridge and a narrow fit.

#### SI TECH VALVES

Swivelling inlet valve and an adjustable automatic outlet valve. Provided by SI TECH.

#### SI TECH QUICK NECK

The neck is equipped with SI TECH Quick Neck System and comes with Waterproof Silicone Neck Seal. Extremely comfortable and easy to change. Latex and neoprene seals are also comatible.

# D8 ORIGO

## OUR LATEST ADDITION TO THE DRYSUIT FAMILY

Some divers prefer a minimalistic design but still demand the necessary features for advanced diving and the highest quality both in material and craftsmanship. The slim fit, anatomically sculpted D8 ORIGO front-zip in strong Poly 300D Tri-Lam is the perfect choice.

D8 ORIGO features adjustable telescopic torso with suspenders that helps the diver to fit the suit to perfection. Long and curved YKK Aquaseal #10 dry zipper enables easy entrance and enhanced upper body movement. All critical parts involved in movement, such as arms, legs and torso have been designed to enhance freedom of movement.

D8 ORIGO is equipped with neoprene Warm Neck and Warm Cuffs, latex neckseal and extended latex seals at wrists, Cordura® 500D reinforced knee pads, soft and light Xlite Flexboots, lightweight pockets with double cord loops and SI TECH valves. Polyurethane print over the seat provides anti-slip and abrasion protection. To complete the package a practical bag with an integrated changing mat is included.

### WARM CUFF

The arms are equipped with super-stretch neoprene cuffs that minimize heat loss at the wrists and protect the seals.

### FRONT ZIP

Long and curved YKK AQUA-SEAL #10 light and flexible plastic dryzipper, placed higher up on the shoulder to enhance upper body movement as well as providing effortless donning and doffing to boost the overall diving experience.

### POCKETS

Light Pockets with cord loops inside. Rubber grip in pocket lid for easier opening.

### BOOTS

Xlite flexboot, soft, light and flexible boot with fin strap ridge and a narrow fit.

### SUSPENDERS

Integrated and adjustable suspenders.

### SEALS

Latex seals at neck and extended seals at wrists. Compatible with Ultima ring systems.

**MATERIAL** - Strong Tri-Lam made of Poly 300D with a butyl core.

**ANATOMICAL FIT** - All critical parts concerning mobility, like torso, pre-bent arms and legs have been anatomically designed to enhance the freedom of movement.

**WARM NECK** - The neck is equipped with super-stretch neoprene collar that minimize heat loss.

**KNEE PADS** - 500D Cordura® reinforced knee pads. Strengthens a critical area of the suit while remaining soft and flexible.

**ANTI-SLIP** - Anti-slip treatment seat provides a non-slip grip and abrasion protection.

**ZIPPER COVER** - Velcro closing cover provides protection of your dry zipper.

**TELESCOPIC TORSO** - Suspenders and the adjustable torso system enables the diver to fit the suit to their liking.

**SEAM-FREE CROTCH** - The crotch is made in one piece, no seams. This to ensure an excellent durable and comfortable suit.

**SI TECH VALVES** - Swivelling inlet valve and an adjustable automatic outlet valve. Provided by SI TECH.

**PLASTIC-FREE PACKAGING** - 100% plastic-free packaging in accordance with our vision of no more plastic in the oceans.

**INCLUDED** - Practical bag with an integrated changing mat, inflation hose, adjustable integrated suspenders, zip lubricant and user manual.

Men: XS, S, M, ML, L, XL, XXL, 3XL, M/+, L/+, ML/t, XL/t, 3XL/t+

# D9X

## BREATHABLE QUAD-LAM ULTRA-LIGHT DRYSUIT

D9X is a breathable Ultra-Light drysuit with technical features. The weight is less than 3kg (medium size), making it the ideal choice for travelling purposes.

D9X is made of light and breathable Quad-Lam fabric. It has extra reinforcements with 500D Cordura® fabric at elbows, seat and knees. The suit is equipped with a plastic dryzipper with zipper cover, XLITE Flexboots, Warm Neck, Warm Cuffs, Latex seals for neck and wrists, light pockets with cord loops and SI TECH valves. The suit has anatomical fit with adjustable, telescopic torso.

### ZIPPER COVER

Velcro closing cover provides protection of your dry zipper.

### POCKETS

Light Pockets with cord loops inside. Rubber grip in pocket lid for easier opening.

### KNEE PADS

Knees are reinforced with an extra layer of hard-core 500D Cordura® fabric.

WATERPROOF

### SEALS

Latex seals at neck and wrists. Compatible with ULTIMA ring systems.

### FRONT-ZIP

Long and curved YKK AQUA-SEAL #10 light and flexible plastic dryzipper, placed higher up on the shoulder to enhance upper body movement as well as providing effortless donning and doffing to boost the overall diving experience.

### BOOTS

Xlite flexboot, soft, light and flexible boot with fin strap ridge and a narrow fit.

**MATERIAL** - The light and breathable Quad-Lam fabric has a top layer of 330D Cordura®.

**ANATOMICAL FIT** - All critical parts concerning mobility, like torso, pre-bent arms and legs have been anatomically designed to enhance the freedom of movement.

**WARM NECK** - The neck is equipped with super-stretch neoprene collar that minimize heat loss.

**WARM CUFF** - The arms are equipped with super-stretch neoprene cuffs that minimize heat loss at the wrists and protect the seals.

**REINFORCEMENT** - Seat and arm reinforcements double layers of abrasion resistance 500D Cordura® fabric.

**TELESCOPIC TORSO** - Suspenders and the adjustable torso system enables the diver to fit the suit to their liking.

**SEAM-FREE CROTCH** - The crotch is made in one piece, no seams. This to ensure an excellent durable and comfortable suit.

**SI TECH VALVES** - Swivelling inlet valve and an adjustable automatic outlet valve. Provided by SI TECH.

**PLASTIC-FREE PACKAGING** - 100% plastic-free packaging in accordance with our vision of no more plastic in the oceans.

**INCLUDED** - Suit bag, adjustable integrated suspenders, zip lubricant, repair kit and user manual.

Men: XS, S, M, ML, L, XL, XXL  
Ladies: XXS, XS, S, M, ML, L, XL

D9X Ladies: Art. No. 668-2

# D10 PRO ISS

## HI-END NEOPRENE BACK-ZIP WITH INTEGRATED SILICONE SEALS

D10 PRO ISS is an extremely durable neoprene drysuit loaded with features. During all our years of continuous testing in harsh conditions, we have found it hard to match the 3,5 mm microcell Limestone CR neoprene with SD Toughtex outer fabric – and that is why we use this material in our D10 PRO ISS drysuit. The suit is also equipped with ISS, the unique Integrated Silicone Seal System that we developed for the diving market. Silicone seals at wrists and neck that can be easily changed in minutes.

The D10 PRO ISS drysuit is equipped with a metal dryzipper with zipper cover, DuPont™ Kevlar® Fiber reinforced and angled boot, rubber kneepads, SI TECH Neck Tite System with Warm Neck, SI TECH QCS Oval Ring System with Warm Cuffs, Silicone seals for neck and wrists, expandable zippered neoprene Power Pockets and SI TECH valves. D10 PRO ISS has anatomical fit, embossed panels and anti-slip PU reinforced shoulders and anti-slip treatment on eat that provides a non-slip grip and abrasion protection.

### SI-TECH QCS OVAL RING SYSTEM

The wrists are equipped with QCS ring system with comfortable Waterproof Silicone Wrist Seals. Easy to change. Latex seals are compatible. Optimised for the use of the ULTIMA dry glove system.

### SI TECH NECK TITE SYSTEM

The neck is equipped with SI TECH Neck Tite System and comes with Waterproof Silicone Neck Seal. Easy to change. Latex and neoprene seals are compatible.

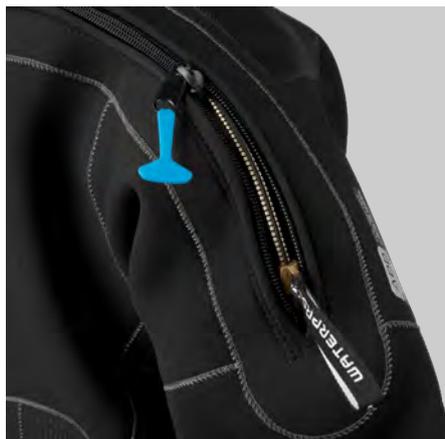

### KNEE PADS

Anatomically shaped knee guards, 3D knee/shin guard for hard-core protection, without compromising comfort and flexibility.

### BACK-ZIP

YKK/BDM metal dryzipper, maximal extended for easy donning and doffing.

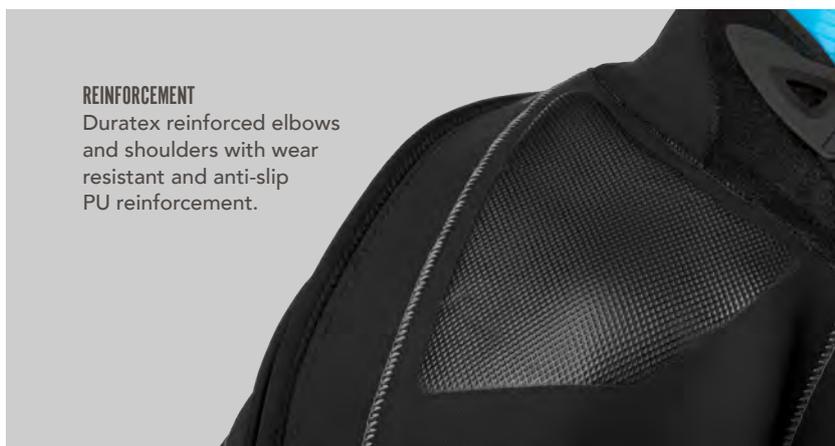

### POCKETS

Expandable zippered neoprene Power Pockets allow you to easily choose between huge capacity or slim profile pockets. Equipped with D-ring and a small inner zippered pocket.

### REINFORCEMENT

Duratex reinforced elbows and shoulders with wear resistant and anti-slip PU reinforcement.

**MATERIAL** - Extremely durable SD ToughTex outer fabric with 100% microcell Limestone CR neoprene, more expensive but in fact the best you can get on the market. Excellent durability, memory and insulation far better than other neoprene qualities.

**ANATOMICAL FIT** - All critical parts concerning mobility, like torso, pre-bent arms and legs have been anatomically designed to enhance the freedom of movement.

**WARM NECK** - The unique Warm Neck solution from Waterproof keeps you warmer due to reduced water movement around the neck. Equipped with drain valves and Velcro tabs.

**WARM CUFF** - The arms are equipped with detachable Warm Cuffs that minimize heat loss at the wrists and protect the seals.

**BOOTS** - Anatomical DuPont™ Kevlar® reinforced boots. Angled for the best mix of durability and performance, manufactured in a new hard-core tested rubber formula Kevlar® reinforced front. Moulded fin strap anchor.

**ANTI-SLIP** - Anti-slip treatment seat provides a non-slip grip and abrasion protection.

**ZIPPER COVER** - Heavy duty cover with outer coil zipper #10, provides maximum protection of the dry zipper.

**CHILL GUARD** - Keeps your body heat in and your undergarments out of the zipper for trouble-free operation.

**SEAM-FREE CROTCH** - The crotch is made in one piece, no seams. This to ensure an excellent durable and comfortable suit.

**SI TECH VALVES** - Swivelling inlet valve and an adjustable automatic outlet valve. Provided by SI TECH.

**MOLDED VELCRO TABS** - TPE tab with moulded Velcro hooks, for adjusting the Warm Neck and Warm Cuffs, sticks only to the assigned Velcro part.

**PLASTIC-FREE PACKAGING** - 100% plastic-free packaging in accordance with our vision of no more plastic in the oceans.

**INCLUDED** - Dry bag, hood, inflation hose, adjustable integrated suspenders, spare silicone set, Neck Tite Tool, zip lubricant and user manual.

Men: S, M, ML, L, XL, XXL, M/+, L/+, ML/t, XL/t, 3XL/t+\*  
Ladies: XS, S, M, ML, L, XL, M/+, L/+, ML/t

*\*Please note! 3XL/t+ have larger wrist rings. These rings do not fit the Ultima DGS system but fit the Quick Glove system from SI TECH.*

D10 PRO ISS Ladies: Art. No. 681-2

# D70

## THE ULTIMATE SCHOOL DRYSUIT

The D70 SC concept was developed after numerous demands from dive schools, instructors and resorts who wanted a durable, yet economical, drysuit for rental and training. D70 SC is a basic 3,5 mm neoprene drysuit. It is perfect for dive schools and resorts as well as a suitable choice for the beginner diver, as a step-in model into the world of drysuit diving.

We used our three decades of diving experience to find the perfect compromise, not in quality, but in technical appearance and design features. The suit is equipped with a metal dryzipper with zipper cover, latex seals at neck and wrist, Warm Neck, rugged and durable boots and SI TECH valves. As all our suits, D70 SC is designed with anatomical fit where all critical parts concerning mobility have been anatomically designed to enhance the freedom of movement.

### SEALS

Latex at neck and wrists.

### ANATOMICAL FIT

All critical parts concerning mobility, like torso, pre-bent arms and legs have been anatomically designed to enhance the freedom of movement.

### KNEE PADS

Polyurethane knee guards provide hard-core protection without compromising comfort and flexibility.

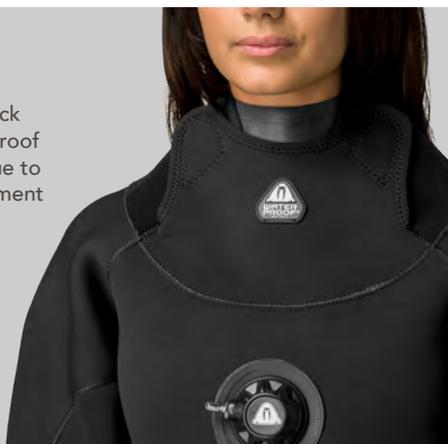

### ANTI-SLIP

Anti-slip treatment seat provides a non-slip grip and abrasion protection.

### WARM NECK

The unique Warm Neck solution from Waterproof keeps you warmer due to reduced water movement around the neck. Equipped with drain valves and Velcro closing.

### REINFORCEMENT

Anatomical DuPont™ Kevlar® reinforced boots. Angled for the best mix of durability and performance, manufactured in a new hard-core tested rubber formula. Kevlar® reinforced front. Moulded fin strap anchor.

**MATERIAL** · Durable double knitted outer fabric with 100% microcell Limestone CR neoprene, more expensive but in fact the best you can get on the market. Excellent durability and insulation far better than other neoprene qualities.

**BACK-ZIP** · YKK/BDM metal dryzipper, maximal extended for easy donning and doffing.

**ZIPPER COVER** · Provides protection of the dry zipper.

**CHILL GUARD** · Keeps your body heat in and your undergarments out of the zipper for trouble-free operation.

**SEAM-FREE CROTCH** · The crotch is made in one piece, no seams. This to ensure an excellent durable and comfortable suit.

**SI TECH VALVES** · Swivelling inlet valve and an adjustable automatic outlet valve. Provided by SI TECH.

**PLASTIC-FREE PACKAGING** · 100% plastic-free packaging in accordance with our vision of no more plastic in the oceans.

**INCLUDED** · Dry bag, hood, inflation hose, lubricant and user manual.

# R7 RESCUE

## THE ULTIMATE SEARCH AND RESCUE, SAR SUIT

The R7 RESCUE concept was developed together with the Swedish Sea Rescue Society, SSRS. This resulted in a safe, comfortable and practical suit, anatomically designed with no restraints. The waterproof and breathable Quad-Lam fabric has a top layer of 330D Cordura® to ensure good durability. The protected front YKK Aqua Seal #10 plastic zipper is more flexible and easier to open and close than conventional zippers.

The telescope torso enables good fit for different body sizes and the suit is equipped with comfortable super-stretch Glideskin neoprene seals at neck and wrists. Knees and elbows are padded and covered with an extra layer of heavy duty Cordura® fabric. Double convertible pockets on the thighs and low profile internal pockets on the arms to ensure good storage possibilities. The lightweight neoprene Flexboots enhance grip, control and comfort, also compatible with flippers.

### POCKETS

Expandable zippered Power Pockets allow you to easily choose between huge capacity or slim profile pockets. Equipped with D-ring.

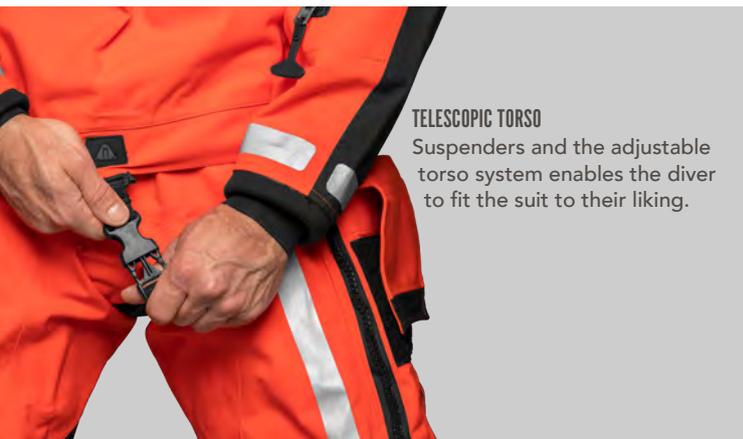

### FRONT-ZIP

The protected front YKK Aqua Seal #10 plastic dryzipper is more flexible and easier to open and close than conventional zippers.

### TELESCOPIC TORSO

Suspenders and the adjustable torso system enables the diver to fit the suit to their liking.

### SEALS

Very flexible, warm and comfortable wrist and neck seals of super-stretch neoprene keep you dry and warm. Less friction due to the Glideskin surface.

### KNEE PADS

Knees are reinforced with an extra layer of hard-core 500D Cordura® fabric. Knees and elbows are also padded for enhanced protection.

### BOOTS

Xlite flexboot, soft, light and flexible boot with fin strap ridge and a narrow fit.

**MATERIAL** - The light and breathable bright orange Quad-Lam fabric has a top layer of 330D Cordura® to ensure good durability.

**ANATOMICAL FIT** - All critical parts concerning mobility, like torso, pre-bent arms and legs have been anatomically designed to enhance the freedom of movement.

**REINFORCEMENT** - Elbows and seat reinforced with an extra layer of hard-core 500D Cordura® fabric. Elbows with extra padding.

**ZIPPER COVER** - Velcro closing cover provides protection of your dry zipper.

**SEAM-FREE CROTCH** - The crotch is made in one piece, no seams. This to ensure an excellent durable and comfortable suit.

**PLASTIC-FREE PACKAGING** - 100% plastic-free packaging in accordance with our vision of no more plastic in the oceans.

**INCLUDED** - Suit bag, adjustable integrated suspenders, zip lubricant, repair kit and user manual.

R7 Rescue Men: XS, S, M, ML, L, XL, XXL, 3XL

Art. No. 451-1

# “OUR VALUES ARE GUIDED BY THE BELIEF THAT QUALITY IS THE STRONGEST PATH TO SUSTAINABILITY”

At Waterproof we make products that enable people to witness the impacts of climate change in our oceans. From the front row, divers are presently and constantly seeing our oceans die, step by step and all over the world. It is a fact we can't hide from. Sustainability is therefore always our main priority!

Most of our suits and accessories are manufactured out of Limestone neoprene which has the lowest carbon footprint in modern wetsuit and drysuit production. The use of limestone neoprene is an effort to make wetsuits as green as possible. Neoprene is extremely durable and a well-designed diving suit will last for years, or in many cases, decades.

The “eco-friendly” alternatives to neoprene currently on the market are not ideal from our point of view. With them, you will get an inferior product with short durability. This is leading to overconsumption, which we don't consider true sustainability and therefore not an option.

We are well aware that neoprene is an imperfect solution. But at the moment, neoprene is still more sustainable than the alternatives. We need to get away from the disposable product mentality and the short life of products worldwide – and move towards a more sustainable production and development of materials.

At Waterproof we believe in making products that last, as this is the most powerful incentive for minimizing our impact on the environment.

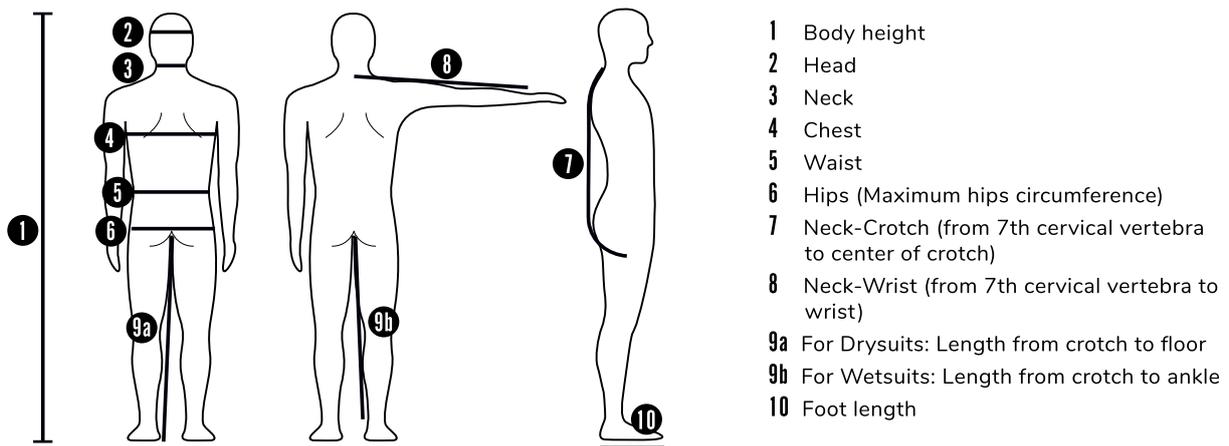

- We actively choose not to support the disposable product mentality.
- We source our materials with great care and only choose the best quality, ensuring a long lifespan of our products.
- We are removing all single-use plastics from our packaging.
- We choose our factories carefully, based on environmental considerations.
- We have a global service organisation working with repairs and maintenance.

# HOW TO CHOOSE THE CORRECT SIZE OF YOUR SUIT

## 1. ASK SOMEONE TO TAKE YOUR BODY MEASUREMENTS

When taking your measurements, it is important that you stand up straight and that you keep the measuring tape as close to the body as possible. See next page for information on how to measure and write down your measurements.

## 2. CHECK THE SIZE CHARTS AND CHOOSE THE CHART THAT CORRESPONDS BEST TO YOUR MEASUREMENTS. STANDARD, PLUS, TALL OR TALL/PLUS.

To ensure accuracy, check more than one size chart.

## 3. MARK YOUR MEASUREMENTS IN THE SIZECHART.

See the examples on the next page.

## 4. CHOOSE YOUR SIZE.

Choose a size that approximates the average of all your measurements. It is normal for your measurements to be spread out throughout different sizes. Our suits have enough allowance and range of motion to accommodate these variations. Soft bodyparts like the belly can be "compressed" a bit while head and neck measurements are not as important on a suit.

If you're buying a drysuit it is important to take into consideration the thickness of the undergarment you usually wear. If you wear very thick undergarments you might want to consider a larger size for comfort. If you are unsure about what size to choose please contact your dealer.

## 5. CHECK IF THE SUIT IS AVAILABLE.

Look the suit up in the catalog and check if it is available in your size.

### DISCLAIMER

Size really matters! Despite similarities in measurements or weight, every person's body is unique. Our size chart is a good starting point to estimate your size but because a wetsuit should really fit like a second skin, we highly recommend that you visit an authorized dealer to ensure a perfect fit. Although all our dry suits have a generous cut that allows plenty of room to comfortably fit a standard undersuit, the different thicknesses of different undergarments designed for various environments needs to be taken into account. The best way to achieve the perfect sizing is to test your dry suit with your own personal undersuit to make sure it fits perfectly. We advise specifically against buying from other sources. It is better to be safe than sorry, so please seek support from your local dealer.

## EXAMPLE 1: MEN'S WETSUIT

Richard most likely fits in both the ML and L sizes.

But as he explains, "I'm broad-shouldered, and when I buy clothes they are usually tight over the shoulders and back, so I opt to buy the larger of the two alternatives, or the size Large". The larger measurements on hips and neck-to-wrist are ok on either the ML or L sizes because a wetsuit is very stretchable.

## EXAMPLE 2: LADIES FRONT-ZIP DRYSUIT

Lisa checks the size tables and finds that she is closest to a Medium Plus size in the PLUS size chart. She also checked the STANDARD size chart but found that the suits are too tall compared to her height. Therefore she chooses the M/+ size.
